

School District of South Orange and Maplewood

Mathematics Department 6-12th Grade

June 23, 2015

Dear Parents/Guardians:

This summer, the Mathematics Department will provide summer math review packet for all students enrolled in Columbia High School math courses. This includes eighth graders who will attend Geometry classes at CHS. Students are required to complete these packets before the first day of school in September. Every class will review this work over the first week (or two) of instruction, and then students will be tested on this content. The test on the math review packet will be the first major assessment of the marking period in each course.

Summer math review packets are identified by course and level of instruction. The summer review packets will be available by July 1st at chsmath.com.

The material contained in these packets represents concepts, skills, and applications that student learned in their previous math course. We strongly suggest that students not wait until the last minute to do the packet. Completed packets will be collected and graded.

To better support students in this process, math teachers will be available, by appointment, during the summer. Teacher contact information will be posted at chsmath.com.

Sincerely,
Dr. Candice Beattys
Supervisor of Mathematics
