Note: The presentations will be the same.

Please choose whichever time/date/location is best for you.

A plan to address safety, security, capacity, and infrastructure needs

SOMSD has developed a preliminary plan to address the District's high priority facilities needs and to ensure that all of our schools are integrated. This \$127.7m plan was unveiled at the May 14, 2018, meeting of the Board of Education and includes:

1) Physical building upgrades

What conditions should be addressed in the district's buildings and associated budgets?

2) Capacity and expansion needs

Addressing enrollment growth, capacity needs and eliminate modular units.
